SUMMARY

Python Full Stack Developer with 1+ year of experience developing secure, scalable web applications using Python, Django, Django REST Framework, React.js, MySQL, and PostgreSQL. Delivered HIPAA-compliant Healthcare IT systems, RESTful APIs, and CI/CD pipelines in an Agile/Scrum environment. Strong in database design, authentication (JWT, RBAC), unit testing, and clean, maintainable code.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Backend: Django, Django REST Framework, RESTful APIs, JWT Authentication, RBAC, WebSockets, Microservice-style API Design

Frontend: React.js, Responsive Web Design, Single Page Applications

Databases: PostgreSQL, MySQL, Database Schema Design, Query Optimization

Tools & DevOps: Git, GitHub, GitHub Actions (CI/CD), Postman, Vercel, Netlify, Render

Practices: Agile, Scrum, SDLC, OOP, Unit Testing, Debugging, Code Review, API Documentation

PROFESSIONAL EXPERIENCE

Full Stack Developer – Healthcare IT | Vesoftmetic Solution Pvt Ltd, Chennai Aug 2025 – Present

- Developed and maintained 3+ full-stack applications for clinical healthcare workflows using Python, Django, and React.js, improving operational efficiency by 25%.
- Designed and optimized MySQL and PostgreSQL schemas for HIPAA-compliant patient data management, handling 10,000+ records securely.
- Built and documented 15+ RESTful APIs with Django REST Framework, consumed by internal teams and external clients.
- Implemented JWT authentication and role-based access control (RBAC) to enforce secure, role-specific data access.
- Set up CI/CD pipelines with GitHub Actions and wrote unit tests achieving 80%+ code coverage; worked in Agile/Scrum sprints.

PROJECTS

Lyka One – Real Estate ERP with SLA Management Engine Python, Django, PostgreSQL, JavaScript
Live: https://lyka-6jhtbbm4g-sandhiyaprakasam23s-projects.vercel.app

- Developed a full-stack ERP with an operations dashboard for clients, tickets, agencies, follow-ups, and deal pipeline tracking.
- Designed a rule-based SLA engine with live countdown timers, breach detection, immutable SLA snapshots, and an append-only audit log.
- Built a Django + PostgreSQL data migration system with idempotent checkpoints, duplicate-resolution rules, and a quarantine ledger.

VoiceText AI – Real-Time Multilingual Speech-to-Text Python, TypeScript, WebSocket, Gemini API
Live: https://vioce-text.vercel.app | Code: https://github.com/sandhiyaprakasam23/VioceText

- Developed a full-stack transcription app (TypeScript frontend, Python backend) supporting 20+ languages, streaming live audio over WebSocket with database-backed history.
- Implemented shareable transcript links and export to PDF, TXT, JSON, and SRT; deployed across Vercel, Render, and Netlify.

AI Medical Report Analyzer Python, Django REST Framework, React.js, OCR

- Built a full-stack platform that extracts and summarizes clinical findings from PDF and image reports using OCR and LLM summarization, with validation and error handling for low-quality scans.

EDUCATION

Bachelor of Commerce (B.Com) – Periyar University 2021 – 2024

CERTIFICATIONS

Python Full Stack Development | Django REST Framework & API Design | React.js Fundamentals | Git & GitHub (2024)

Languages Known: Tamil (Native), English (Professional)
